DROPPING SOON

A photograph of a rocket launching vertically from a dense layer of white and grey clouds. The rocket's path is marked by a bright, glowing orange-yellow plume that tapers off as it ascends. The background is a clear blue sky transitioning into a warm orange and yellow glow of a setting or rising sun. A small, thin crescent moon is visible in the upper right quadrant of the sky.

ARTIST VISION:

A world with no more starving artists.

ARTIST MISSION: #IdeasFireRockets™

1. Follow my art. Create art. Live off my art.
2. Leave a path for other artists to live off their art.
3. Art everywhere, even in space, using IPFS.

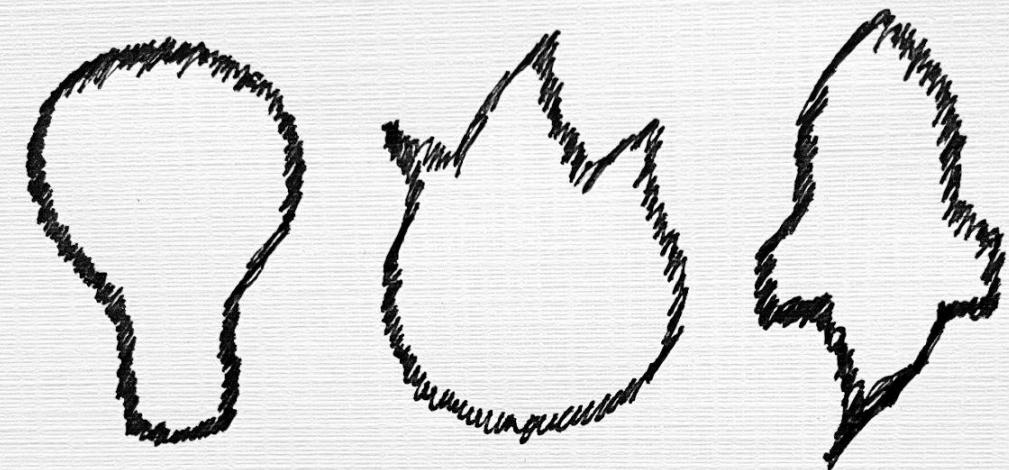

#IdeasFireRockets™

PROBLEM

**98% of artists
cannot survive
on their art.***

Humanity operates under a centralized model which alienates outliers like artists who are often independent. Thus, only 2% of artists survive on their art.

*SOURCE: *The Art Newspaper*,
“Can artists live off art alone?” May 15, 2019

#**IdeasFireRockets**™

SOLUTION

Full artistic freedom, NFT royalties, and art everywhere.

An interplanetary file system for distributed art unlocks the power for true artistic freedom. A universe where art is accessible and uncensored.

Non-Fungible Tokens (NFTs) address an issue plaguing the fine art world for centuries called the First Sale Doctrine where artists do no profit from

secondary sales of their artwork as opposed to musicians and authors. NFTs unlock the potential of royalties on secondary sales via the French commission concept of Droit de Suite.

Finally, the creation of the InterPlanetary File System (IPFS) allows the ability for art anywhere. Even in another galaxy.

#IdeasFireRockets™

HYPOTHESIS

**If I can make it
as an NFT artist,
then others can too.**

VARIABLE: Build an NFT iterative artistic loop that uses IPFS.

IDEAL RESULT: A simple and profitable NFT artistic loop.

RATIONALE: Launch during Web3 Jam and test the hypothesis.
Document the process. Review the results.

MISSION: *Solo*

A photograph of a rocket launching vertically upwards from a dense layer of clouds. The sky is a vibrant orange and yellow gradient of a sunset. A small crescent moon is visible in the upper right corner. The rocket's exhaust trail is a bright, glowing vertical line against the darker sky.

CURRENT STATE

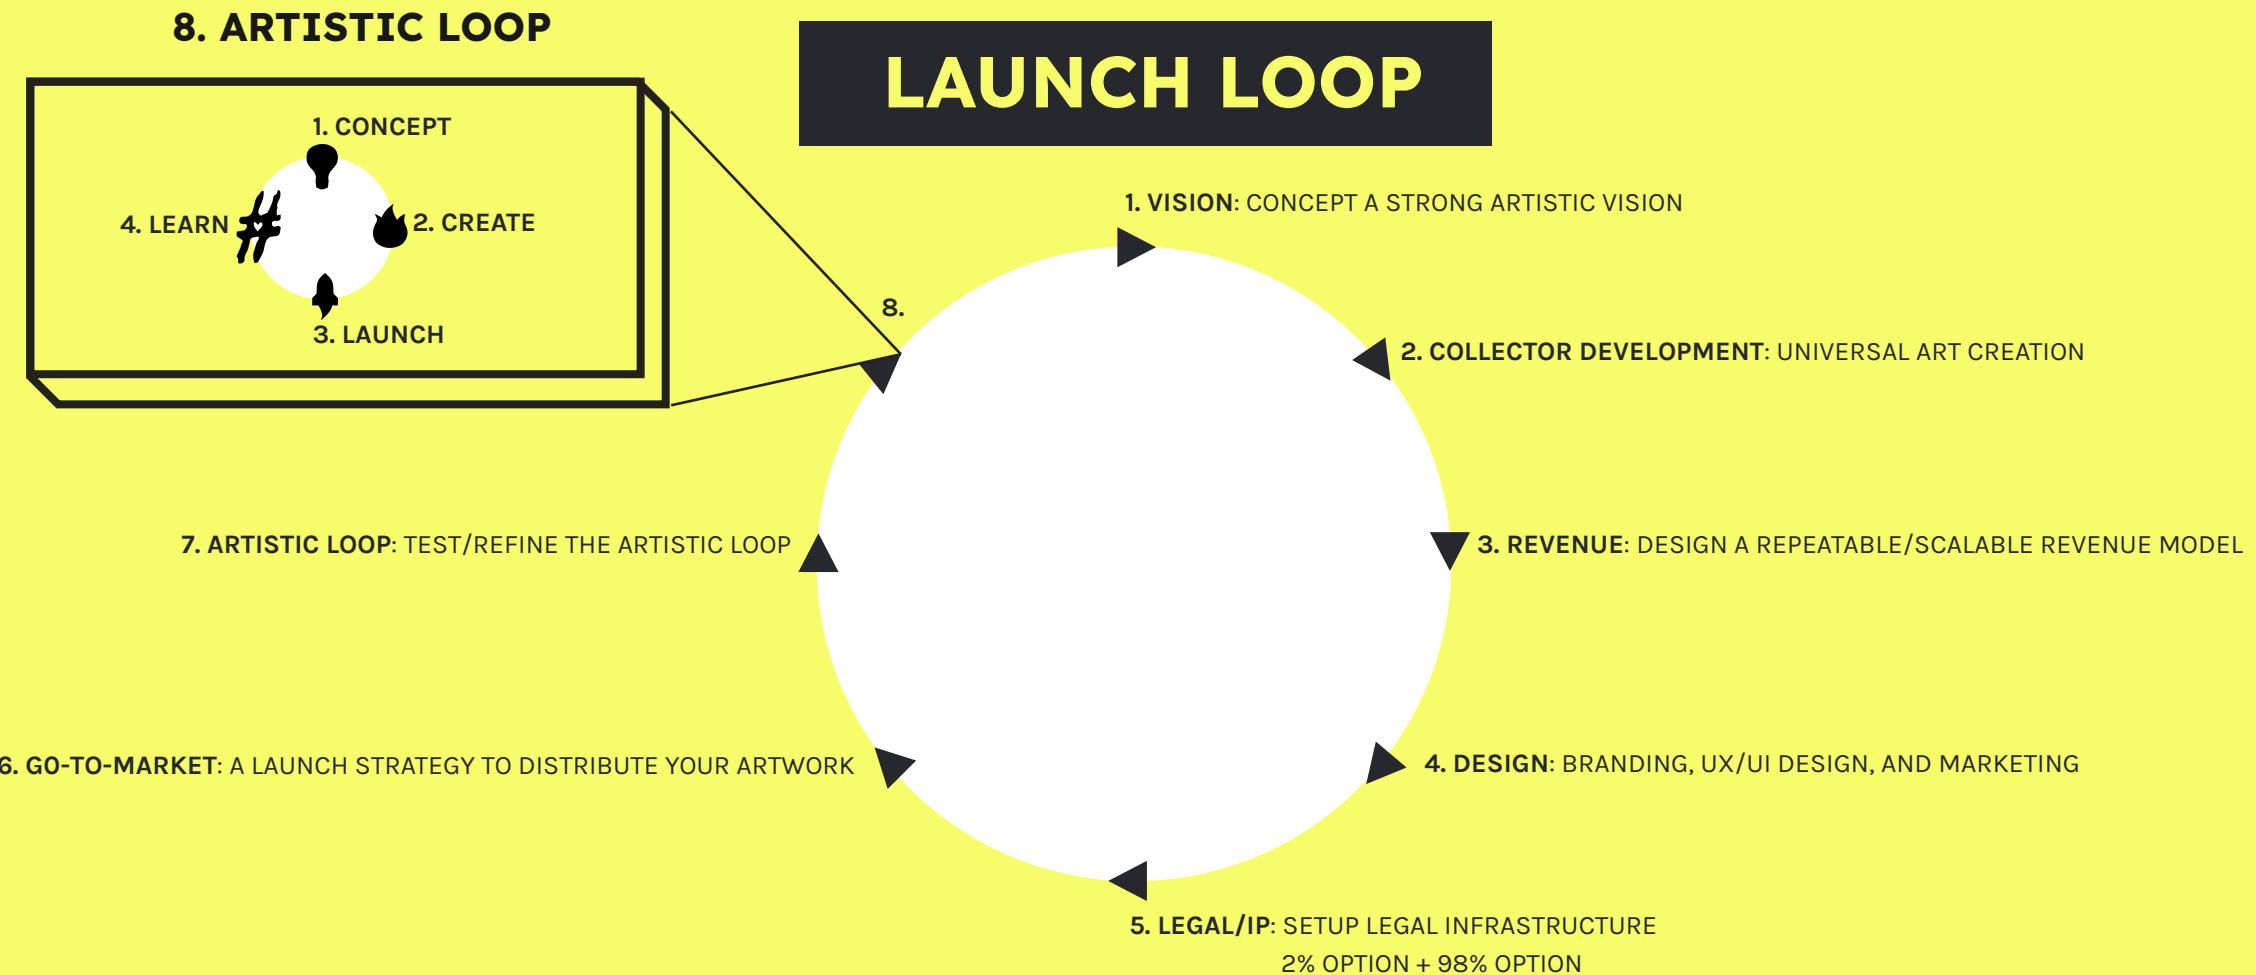

Most artists operate independently and without a proper digital process for selling art on Web3.0 (aka the future of the internet).

DESIRED END STATE

Create an NFT artistic loop that is easy and profitable for artists to follow for utilizing the benefits of Web3.0 and IPFS storage.

1. CONCEPT: BRAINSTORM YOUR ARTISTIC VISION

- PASSION - Will this inspire me my entire career?
- PURPOSE - What is your view of the world?
- WHAT - What is your subject matter?
- HOW - How will you create your work?
- WHY - Why do you make this?

2. CREATE: DEVELOP THREE ARTIST STATEMENTS

3. LAUNCH: FINALIZE YOUR ARTIST STATEMENTS

4. LEARN: SHARE IT WITH OTHERS AND REFINE

At first glance, the inaugural series by the artist #IdeasFireRockets appears as a familiar juxtaposition of nature and culture, between the organic and the human-made. Yet  inverts traditional representations of human intervention in the landscape, often layered over dominating and manufactured landscapes that ground and control the wild, untamed natural environment in this new anthropocene era of extraordinary human impact.

Here, we find the manufactured or endangered environment treated as a starting point of "nature." The artist adds a layer of language - a symbol of culture and constructs - comprised of organic or artificial materials onto environments of existing or impending entropy. In doing so, the work extends historical questioning of these binaries, but with a more inclusive non-binary dimension. Is the landscape a pop art cultural billboard and made for public address, a post-digital still life simply capturing a moment in time, or a space to leave an anonymous - perhaps more intimate - level letter to an artist muse like a lover or planet earth?

The legal flow of crypto into FIAT.

Blockchain and NFTs have the potential to improve an artists accounting by reducing the costs of maintaining and reconciling ledgers, and providing absolute certainty over the ownership and history of art assets. Blockchain can help artists gain clarity over provenance and free up resources to concentrate on planning rather than recordkeeping.

DISCUSSION

Keep it simple.

The excitement of being part of something new, and cutting edge, makes the Web3.0 process exciting and worthwhile. From minting your first NFT, to freezing your metadata on IPFS, and seeing your first sale. The process is worth your investment of time and resources.

The challenges in the process are mostly technical. Building a Web3.0 website is not as streamlined as launching a traditional website. The process seems analogous to the horse and carriage being updated to the automobile. The process is significantly more complicated but the performance capabilities are boundless.

The best advice is to keep it simple. Literally, the more basic the better.
